

## ROLL AWAY® Series 7500

### Measuring Instructions

#### Step 1 Examine Door Opening Condition

This door system requires a flush surface the entire perimeter of the opening in order to properly install. To clear the opening, the flush surface must be at least 2-1/2" at the jamb the housing will be installed on, at least 9/16" at the jamb the closer will be installed on, and at least 1-1/8" at the head and sill.

Record measurements below.

Width: \_\_\_\_\_ X Height: \_\_\_\_\_

**Note:**

The dimensions for a Surface Mount Door are derived from the details in this section. Measuring by these dimensions will provide a door that will fit your opening.

#### Step 2 Determine the Proper Side of Opening to Install Door

For a normal installation the ROLL AWAY® Door will be installed on the same side as the hinges on the main door. Will the door operate from Right to Left, or Left to Right?  
*Note: French door installations have 1 each (1 Left to Right and 1 Right to Left).*

LH Door will operate from Left to Right  
 RH Door will operate from Right to Left
